Title: Crazy Machines 2 - Jewel Digger DLC

Genre: Casual, Strategy

Developer:

Fakt Software

Publisher:

Viva Media

Release Date: 3 Jul, 2014

a09c17d780

English, German

Dead game, dont be fooled and buy it.. One of the worst Telltale games. The UI is buggy at best, the audio is distorted at times and the puzzles are not even puzzles or are not fun.. gearbgaergb. What can be said? Well this is the "tipical" city defence style as others but different graphics. I do enjoy these "not too time coonsuming games" I can hop on check my things attack someone and while my troops come back (are being made/trained) I can play another game as well. This type of games is just relaxing and probably not for the impatient people who want everything done very quickly. It does take 2 days to get a lvl 5 town center o.o about a day or so for defences the higher they are. I can see why it would bother some but I've played enough of these to just ignore it and play something else while I wait. Overall I would recommend this game to people who do enjoy these type of games but I would not recomment it to people who want everything done in a day.

Have a marvelous day! and game on :). Ninja please!

Old sticking out of the shadows lookin\u2665\u2665\u2665\u2665Old chinese stars be dull as vanilla wafers
lookin\u2665\u2665\u2665\u2665Old smoke clouds be lookin like flour lookin\u2665\u2665\u2665\u2665This
gem is only for
real ninjas.. A simple Worms-style gameplay, at a rock-bottom price. Could have used more polish. For example, the functions of the two action-types are not explained. There are no golf clubs to select, nor directions to aim. The mechanics of obstacles, wind speeds, and ability-skills are not explained. The system of meta-game unlocks are not explained. Also, I am very annoyed that the xbox-style gamepad controller doesn't work, and the keyboard controls do not access the menus.

If you have the patience to look past the short-comings, then I think there is a golf-campaign to be explored. You will be limited to only one club, only hitting the ball straight ahead, and a having to learn as you go. Maybe you can even get your controller working with it. Dog Gone Golfing uses the Game Maker game engine. I tried playing this on an Ubuntu 18.10 system. I bet the designer had a lot of fun playing this game, but he seems to have had trouble figuring out how to share his experience with new players.. Automatic transmission doesn't work on snow and ice atm.. I really wish I had read mroe into this game before buying it. I like planes so I saw planes and though ooh this will be fun! It's not. The controls are horrible, I mean BEYOND horrible, it's oversensative and really laggy - is that even possible?! I couldn't find a way to change the controls, I wouldn't even play this with a gaming pad.. I keep getting stuck behind landscaping when in mission mode, there is no way to back yourself out. Keep needing to restart the game and try to find a different route - it's very frustrating for what should be a fun casual game. I'm really disappointed that I spent my money on this.. Yeah!.....another old school retro side-scrolling shooter with loads of weapons to choose from, upgrades to choose from, boss battles to fight, and reasonably challenging levels to play through; (not too easy, not too hard). This is an ideal starter for newcomers to the genre; it's cheap, (only a measly £4.49 {approx \$6.50}), and it's dead easy to play. You can even use your joystick or controller' if you've got one;. (I used my Saitek joystick as i'd just been playing HAWX 2 and it was a joy to play with rather than have to use the keyboard controls). You can customise your ship and include several weapons that can be cycled through to take advantage of different in game situations.

The graphics are colorful and any one familiar with the games of old (circa 1980's - 90's) this will bring back memories of the time spent in the arcades competing against your friends (money well spent), then playing them on the first console back in the mid to late 80's

You don't need this

Seriously, if your computer is working fine don't even bother. Even if something is faulty, just use google or look up the manufacturer and go to their website/forum for drivers or advice. Hell you could go practically on any game forum and ask if you don't know what you're doing or watch a video on youtube.

Stuff like this will either slow down your system, break it, install malicious software or all of the above more than likely. Even in the best case scenario it will at least do one of those things and while it may not be obvious at first, it will as time goes on.

There are not any programs that I know off that boosts performance or installs all kinds of drivers that did not come with some sort of problem and I've been into computers since the 80's so I think I should know. All it takes for it is to install the incorrect drives, replace or remove other files and so forth for something to go wrong.

Do what you want but if it works for you that's great but it's not reliable even if it seems so. In the end I still stand by my first statement. If it's not broke and working as intended it doesn't need fixed or altered.. Very fun game, it would be nice if theres thirdperson option so you could see ur customization

. nice and playable...but with lack of adventure.... Delightful point and click adventure, manages to feel classic and modern at the same time.

Great art, interesting setting and puzzles of exactly the right difficulty.

Oh, and awesome dream sequences - they deserve to be mentioned separately.. Thought I was getting into a game about divination or astronomy. Instead, I've ended up collecting strands of hair.
